

CRYPTO KIDS CAMP

*LET'S GO
B.E.A.S.T.M.O.D.E.!*

Accelerating children's knowledge of technology and financial literacy while building leaders, innovators, and creators for a decentralized future.

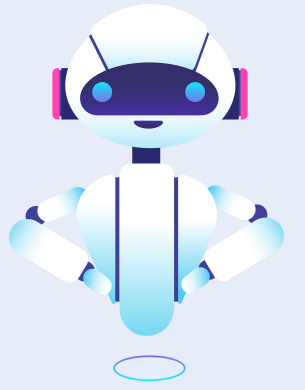

Purpose & Mission

Crypto Kids Camp was created to expose youth in underserved communities to education that is not readily available in public schools.

Most inner-city schools don't offer basic technology education, let alone blockchain or cryptocurrency subject matter. This is creating a problem in which African-American and Latino communities are severely underrepresented in emerging technology fields and industries.

Elevating S.T.E.M & S.T.E.A.M.

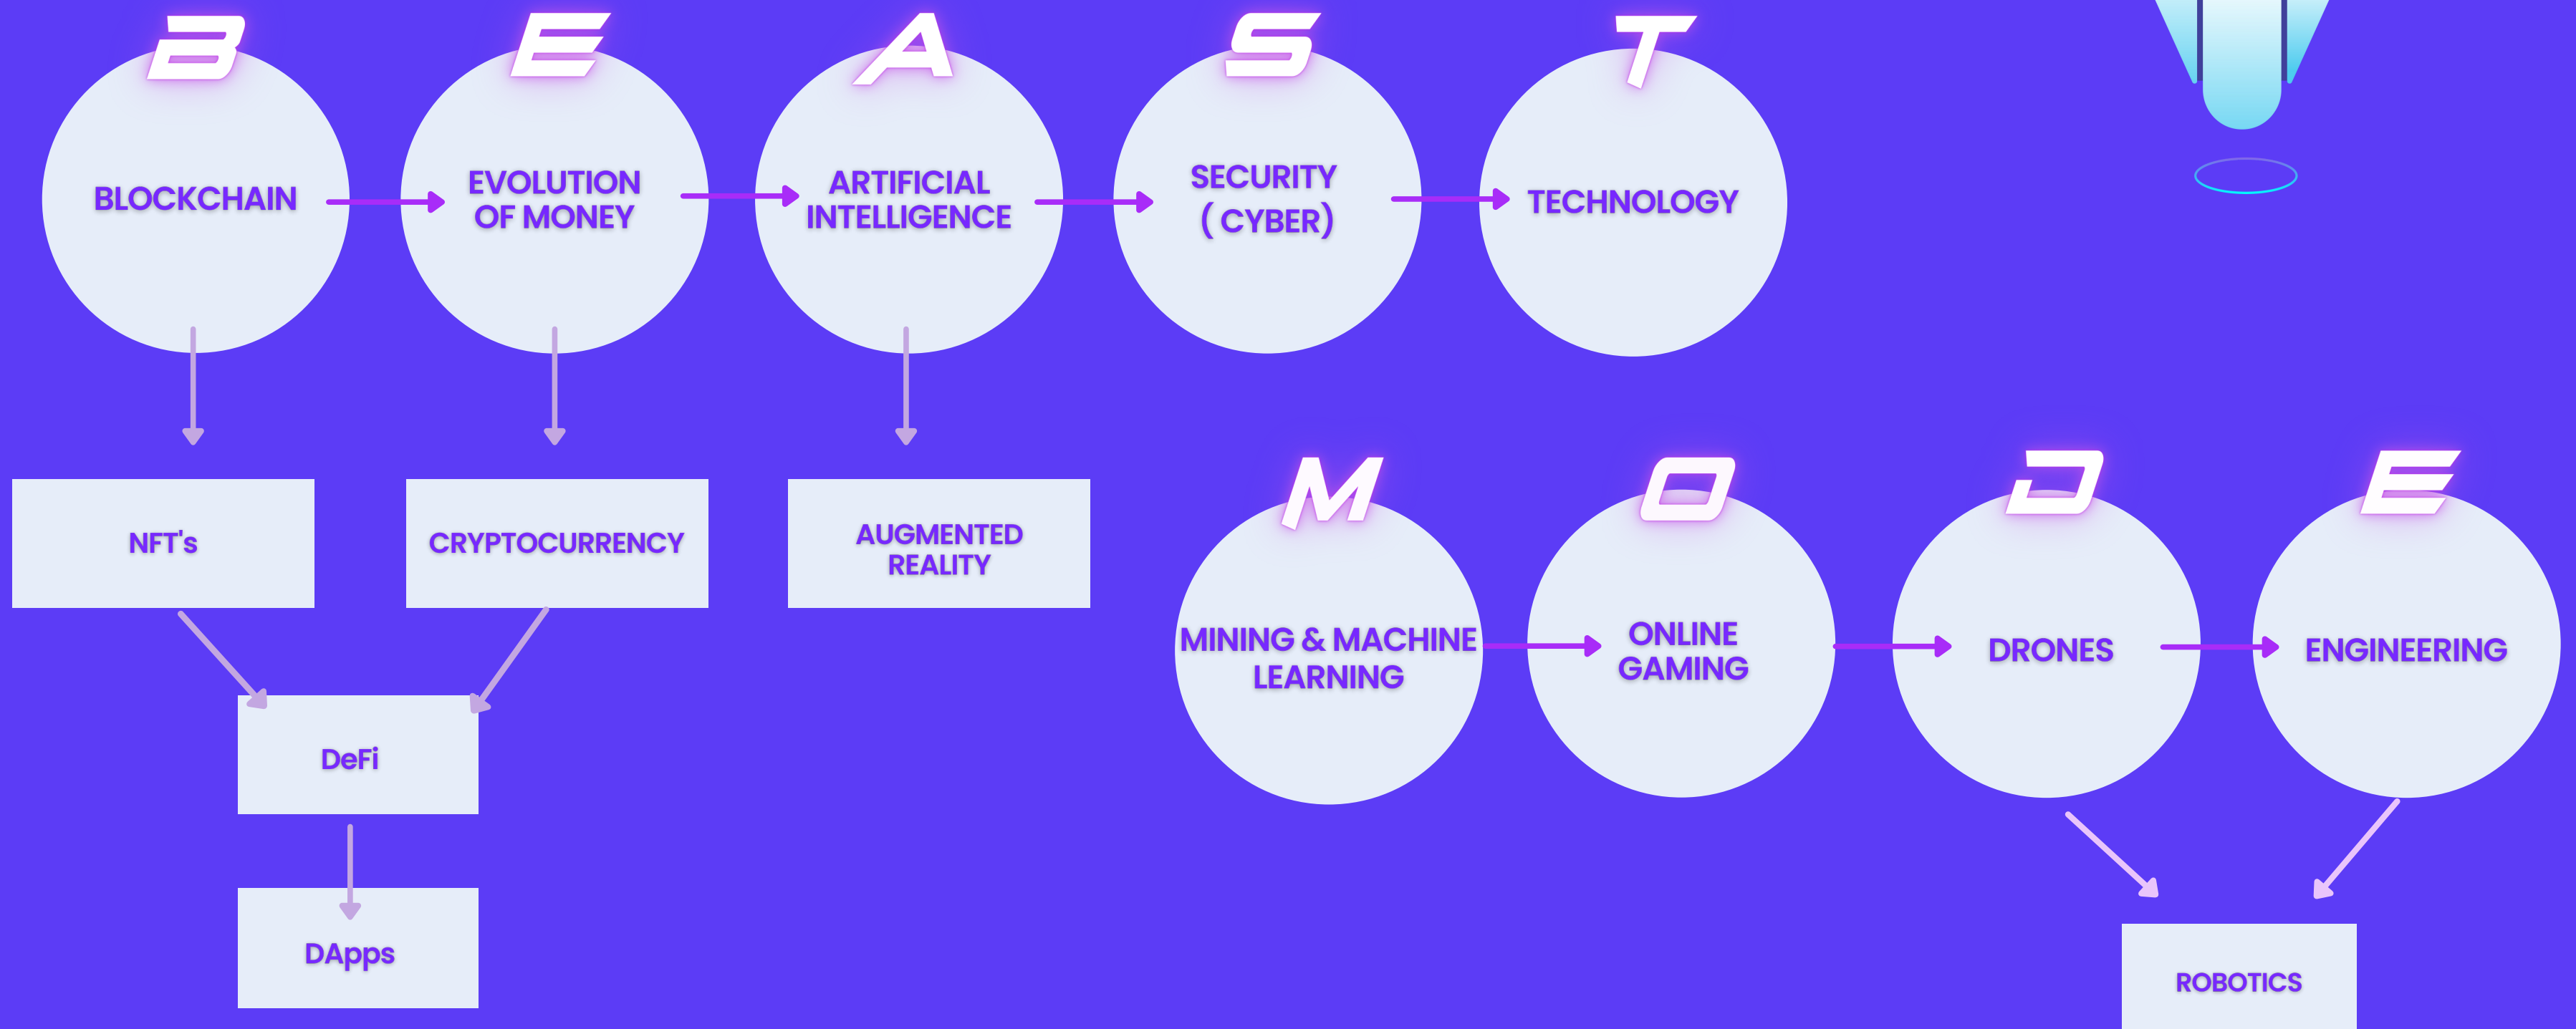

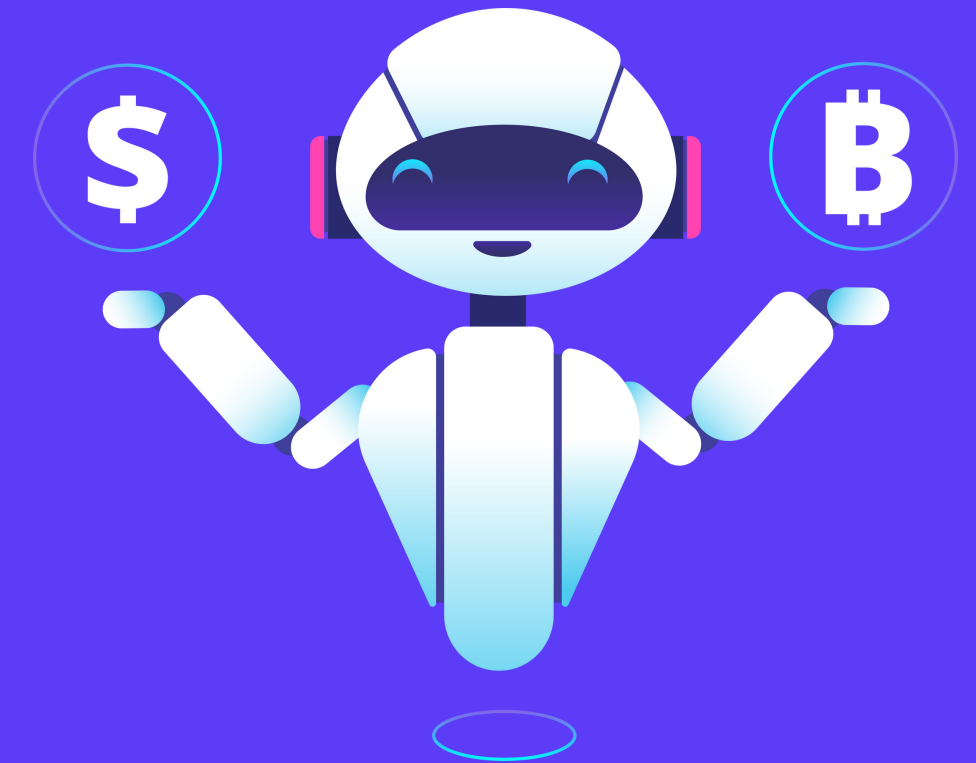

While S.T.E.M. and S.T.E.A.M have traditionally been the standard for the world of science and tech education that most are familiar with, it often fails to keep up with the lightening fast pace of technological innovation.

Crypto Kids Camp combines emerging technologies like Blockchain, Cryptocurrency, and NFT's to improve upon these programs while also creating a lane of our own.

B.E.A.S.T.M.O.D.E.

is the acronym we use for our core fundamentals. Don't see coding? That's right! Coding programs are already so plentiful, we decided to go against the grain and do something different!

A Focus on Fundamentals

Our goal is to spark a fire with fundamentals so campers will continue to pursue more in-depth education, and hopefully later on a career in tech! We also provide campers a full scope understanding of money and currency, from bartering to how we arrived at Cryptocurrency.

For hands on learning, we work with tools like:

- Laptops
- Virtual Reality Goggles
- Drones
- Cell Phones
- Robotics (Raspberry Pi)
- & more!

Catch us on
NBC NEWS!

At a summer camp, juice boxes and bitcoin mining

In a season of frenzied bitcoin trading, a Los Angeles camp is offering kids as young as 5 a crash course in all things crypto.

— A camper holds up an example of "fat money" at the Crypto Kids Camp in San Pedro, Calif. Maggie Shannon / For NBC News

Impact

Our program is held during Winter, Spring, and Summer breaks, which are statistically the times when youth get in the most trouble. CKC provides a constructive and fun option for parents to keep young minds engaged during this down time.

100% of camper parents would send their kids back to Crypto Kids Camp, and believe the program is needed in more communities.

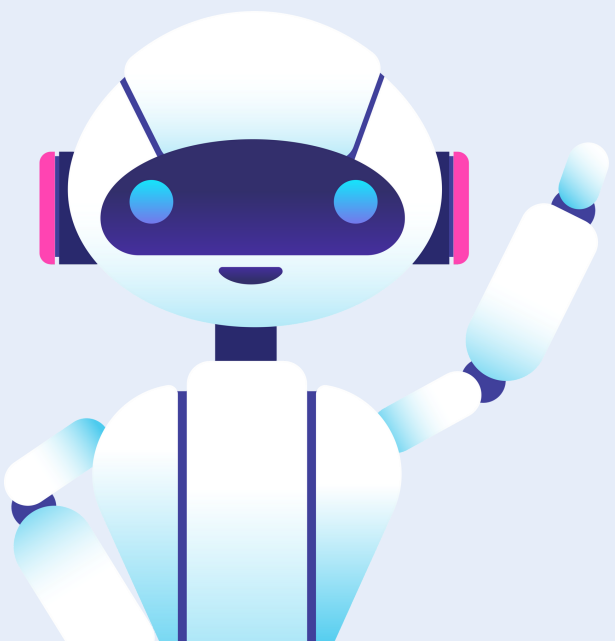

Expansion & Growth

As a 501(c)3 non-profit organization, Crypto Kids Camp depends on contributions from our valued sponsors and donors to help us make an impact in more communities.

We're always seeking strategic partnerships to help youth everywhere get the education needed to propel them into the decentralized future of tomorrow. Our sponsors / donors help support :

- Program Variations
- Instructor Time & Training
- Instruction Materials (Laptops, Drones, Phones, Robots)
- Operational Expenses
- Curriculum Development

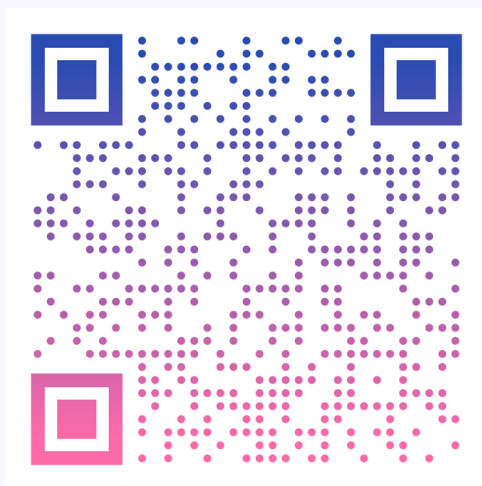

Thank you for your support!
